Art,

After conferring with Victoria, please have ERT charge as they normally would for a response. If they are supporting, they should reflect the site identifier in Peopleplus. FANs should remain as normal.

Victoria, please explain further, if needed.

Thanks

Jen

Hi Art,

I talked with Philip about the account string below that was provided for use by Greg Powell.

Greg has been requested to directly support the response in the field. I have a couple of questions that I've asked Philip Werner below, and he is going to check in with Christine Portillos. Here are my questions:

I am wondering if this account string can be used for general support by any of our staff who are putting in time on the response in support of Region 8? If yes, then would replace the 08L with 72G for our folks as needed. Alternatively, is this number only to be used by those who have been activated "officially" thru the Incident Command System (ICS) by Region 8?

I am wondering if this account string is the same for all EPA working the response and therefore only the Region/office identifier would be different (e.g., the 08L would be whatever one's regional or office code is). If this is the case, the question on whether or not one needs to be activated through ICS is still a relevant question.

Maybe Harry and Dee know the answers to these questions, but I thought to pass them by you as well.

Thanks,

Marc

Marc,

Below is the account number that we received. We always change the (08L) to 72G unless they specifically state that they are paying for employee's hours.

Our string will look like this: T 72G 303DC6 A8K9RV00. Greg's timecard has this accounting string.

If you find out that we should use the 08L, let me know.

Thanks.

Edith
